

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are currently 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those in service in North America. Clark has five major lines of forklifts across the world, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 unique models of forklifts, with components covering more than 120,000 specific components for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to offer the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very amazing intercontinental support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering protection features such as the operator restraint system. This exceptional dedication to safety is currently a customary feature on every forklift.

Clark has a continual goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Lean Production

Clark has chosen the extremely economical and advantageous structure of "Lean Production" for its assembly facilities and application of resources. This system was developed to acknowledge the most efficient method of manufacturing facility stewardship and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing costs. The new value engineering agenda combines progressive product development and offers improved client support and service within the industry.
