Aerial Lift Train the Trainer Burlington

Aerial Lift Train the Trainer Burlington - The train the trainer program for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers would be given in-depth instruction about the workings of aerial lift equipment. The program is offered on an open enrollment basis and delivered at select training sites. Prior to certification, trainers are evaluated and graded based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider in the business, we offer the best hands-on training possible through opportunities to practice concepts and techniques learned within the classroom. In addition to hands-on experience, trainers develop general knowledge of machinery theory and instructional techniques, classroom and field communication skills, and ability to successfully train and evaluate operators. Trainers would gain knowledge about what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right techniques necessary to be able to express the correct information inside the classroom and field setting. There are three factors of machinery operation which the trainer should learn how to convey to operators: what to do; how to do it; and the reason why it should be done.

The program offers detailed, up-to-date reference material to help trainers convey the subject matter to machine operators. Manuals contain detailed information on all aspects of industrial mobile machine operator training. Included within the package are training aids that provide a visual reference to enhance the learning experience. The equipment-specific training products contain necessary materials for both the trainer and the operator: overhead transparencies, videos/DVD's, safety message posters, equipment models; stability pyramids and digital training aids.
